Ajdin Husic

Senior Full-Stack Software Engineer

Experience: 10+ years, Senior (React, React Native, .Net) **Location:** Schiedam, South Holland, Netherlands
Email: ajdin.husic.dev@gmail.com
LinkedIn: linkedin.com/in/ajdin-husic-590b9b48
GitHub: github.com/AjdinHusic
Portfolio: ajdin.husic.dev
Languages: Dutch (Native), English (Professional), Bosnian (Native), Croatian

---

Professional Summary

Experienced Senior Software Engineer with 10+ years of experience in full-stack development, specializing in .NET, React, React Native, and modern web and mobile technologies. Proven track record building cross-platform mobile applications and scalable web solutions. Extensive expertise in backend development, frontend and mobile frameworks (including React Native and Flutter), DevOps, GIS operations, and IoT solutions. Delivers high-quality applications and leads technical projects across multiple industries including recruitment, R&D, and agricultural technology.

Education

Master's Degree in Engineering

Technische Universiteit Delft | *2016-2018*

- **Specialization:** Advanced technical engineering and software development
- **Relevant Coursework:** Software engineering, system design, advanced mathematics, technical project management
- **Student Assistant Experience:** Tutored fellow students in dynamics and engineering courses
- **Key Skills Developed:** Problem-solving, technical analysis, project management

Bachelor's Degree in Engineering

Technische Universiteit Delft | *2013-2016*

- **Major:** Engineering with focus on software development and technical systems
- **Relevant Coursework:** Programming fundamentals, mathematics, physics, engineering principles
- **Key Skills Developed:** Technical problem-solving, analytical thinking, mathematical modeling

Additional Education

Hogeschool Rotterdam | *2013-2014*

- **Role:** Peer Coach (September 2013 - February 2014)
- **Experience:** Mentored fellow students and developed leadership skills
- **Skills Gained:** Communication, mentoring, leadership, academic support

---

Work Experience

.Net Engineer

Cognizant (client: PGB Pensioendiensten) | *December 2025 - April 2026*

- **Key Responsibilities:**
  - Development of a digital participant portal (emportal) for pension participants
  - Building functionality enabling users to view their pension information, download documents, and plan their future retirement according to their associated policies and pension schemes
  - Contributing to a user-friendly, secure environment for pension participants within a SCRUM team
- **Technologies Used:** .NET Framework, jQuery, Optimizely CMS, SQL Server, SCRUM
- **Key Achievements:**
  - Developed components of the participant portal for PGB Pensioendiensten, with focus on pension insight, document management, and retirement planning
  - Worked in an agile SCRUM environment with .NET Framework and Optimizely CMS for content management and frontend interaction

---

Senior Software Engineer (.Net and React)

Eurofins Agro & Horti NL | *February 2024 - December 2025*

- **Key Responsibilities:**
  - Leading development of full-stack applications for agricultural and horticultural solutions
  - Designing and implementing scalable software architectures
  - Collaborating with cross-functional teams to deliver high-quality applications
  - Mentoring junior developers and conducting code reviews
- **Technologies Used:** C#, ASP.NET Core, React, TypeScript, MySQL, Docker, Kubernetes, Terraform, Azure DevOps
- **Key Achievements:**
  - Developed advanced GIS operations with custom algorithms for polygon management and spatial data processing
  - Implemented sophisticated mapping solutions for agricultural and horticultural applications
  - Created efficient spatial algorithms to optimize polygon operations and improve system performance

---

.NET, React / React Native Software Engineer

Swiply B.V. | *2021 - dec 2026*

- **Key Responsibilities:**
  - Leading complete architecture design and development of full-stack solutions
  - Developing and maintaining frontend applications including website portal and cross-platform mobile applications
  - Building robust backend systems and managing database architecture
  - Implementing comprehensive DevOps infrastructure and deployment pipelines
  - Managing business operations and strategic technical decisions as co-owner

- **Technologies Used:** Next.js, Flutter, React Native, .NET 9, PostgreSQL, Docker, Linux Ubuntu, Portainer, GitHub Actions, CI/CD Pipelines, Self-hosted Registry
- **Key Achievements:**
  - Designed and implemented complete end-to-end architecture for multi-platform applications
  - Successfully developed and deployed website portal using Next.js with modern web technologies
  - Built cross-platform mobile applications using React Native and Flutter; delivered one product as a React Native prototype for rapid validation
  - Built scalable backend systems using .NET 9 with PostgreSQL for optimal performance
  - Established comprehensive DevOps infrastructure with Docker containerization and self-hosted registry
  - Implemented automated CI/CD pipelines using GitHub Actions for continuous integration and deployment
  - Managed Linux Ubuntu servers with Portainer for efficient container orchestration and monitoring

---

React Native / Full-Stack Software Developer

ProCC | *December 2019 - February 2024*

- **Key Responsibilities:**
  - Developed full-stack web applications using modern .NET Core and React technologies
  - Built cross-platform and mobile-capable frontends with React and React Native
  - Implemented clean architecture patterns with CQRS and MediatR
  - Built responsive frontend applications with React, TypeScript, and modern state management
  - Configured and maintained DevOps infrastructure using Docker and Ubuntu servers
- **Technologies Used:** C#, ASP.NET Core, Web API, FluentValidation, JWT Authentication, MySQL, Entity Framework Core, LINQ, Dapper, Clean Architecture, CQRS, MediatR, AutoMapper, React, React Native, Vue, TypeScript, Redux, React Query, React Router, Jotai, Ant Design, Material UI, Emotion, VPS, Ubuntu Server, Docker, Docker Compose, Kubernetes, Nginx, Portainer, Raspberry Pi, Python, WebSockets, Node.js
- **Key Achievements:**
  - Successfully delivered multiple full-stack applications over 4+ years
  - Implemented modern architectural patterns improving code maintainability
  - Set up comprehensive DevOps pipeline with containerization

---

Software Engineer

Lions Development | *January 2023 - July 2023*

- **Key Responsibilities:**
  - Developed web applications using HTML, Bootstrap CSS and JavaScript
  - Created responsive web applications with modern frontend technologies
  - Collaborated with development team on various client projects

- **Technologies Used:** HTML, Bootstrap, Css, JavaScript, Frontend Development
- **Key Achievements:**
  - Delivered high-quality website

Software Developer

U-Team Recruitment | *March 2018 - March 2023*

- **Key Responsibilities:**
  - Developed recruitment and matching software solutions using .NET MVC
  - Built frontend applications for technical recruitment platform using React
  - Developed a mobile application for the recruitment platform using React Native
  - Worked on part-time basis while maintaining other commitments
- **Technologies Used:** .NET MVC, React, React Native, Vue, Frontend Development
- **Key Achievements:**
  - Contributed to technical recruitment platform development over 3+ years
  - Delivered mobile app capabilities alongside web-based recruitment tooling

---

(R&D) Engineer

Stinis Holland B.V. | *March 2019 - December 2019*

- **Key Responsibilities:**
  - Conducted research and development activities
  - Worked on engineering solutions and product development
  - Collaborated with R&D team on innovative projects
  - Developed AI vision solutions using Python and OpenCV
- **Technologies Used:** Python, AI Vision, OpenCV
- **Key Achievements:**
  - Gained valuable experience in R&D processes and engineering methodologies
  - Developed computer vision solutions for industrial applications

---

Web Mining Scripter

Textkernel - Machine Intelligence for People and Jobs | *March 2018 - February 2019*

- **Key Responsibilities:**
  - Wrote rules for extraction of relevant data from websites
  - Monitored spidered websites for completeness and quality
  - Implemented continuous quality improvement processes
  - Maintained data extraction systems for job and people intelligence
- **Key Achievements:**
  - Improved data extraction quality and efficiency

- Gained experience in web scraping and data processing

Student Assistant

TU Delft | *September 2015 - March 2018*

- **Key Responsibilities:**
  - Assisted with academic courses and student support
  - Provided tutoring and guidance to fellow students
  - Supported educational activities and coursework
- **Key Achievements:**
  - Gained teaching and mentoring experience
  - Developed strong communication and leadership skills

Technical Skills

Programming Languages

- **Backend:** C#, Python, Node.js, SQL
- **Frontend:** JavaScript, TypeScript, HTML5, CSS3
- **Desktop:** C# (WPF applications)
- **IoT:** Python, Node.js

Frameworks & Libraries

- **Backend:** ASP.NET Core, Web API, Entity Framework Core, Dapper
- **Frontend:** React, Vue, Redux, React Query, React Router, Jotai
- **Mobile:** React Native, Flutter, Android, iOS
- **Desktop:** WPF, Electron
- **Architecture:** Clean Architecture, CQRS, MediatR, AutoMapper
- **UI Libraries:** Ant Design, Material UI, Emotion, Tailwind CSS, Prime React

Databases & Data Access

- **Databases:** MySQL, SQL Server, PostgreSQL
- **ORM:** Entity Framework Core, LINQ, Dapper

DevOps & Infrastructure

- **Containerization:** Docker, Docker Compose
- **Infrastructure as Code:** Terraform
- **CI/CD:** Azure DevOps, Git, GitHub
- **Web Servers:** Nginx
- **Operating Systems:** Ubuntu Server, Windows, Linux Server
- **Server Management:** VPS, VDS, Portainer
- **Cloud Platforms:** Azure (via Azure DevOps), VPS/VDS, Linux Server

IoT & Real-time Communication

- **Hardware:** Raspberry Pi
- **Communication:** WebSockets
- **Languages:** Python, Node.js

Authentication & Security

- **Authentication:** JWT (JSON Web Tokens)
- **Validation:** FluentValidation
- **Security:** Authentication systems, secure API development

GIS & Spatial Technologies

- **GIS Operations:** Custom polygon algorithms, spatial data processing
- **Mapping Solutions:** Agricultural and horticultural mapping applications
- **Spatial Algorithms:** Polygon management, geospatial data optimization
- **Geographic Data:** Spatial analysis and visualization

Design & CAD

- **CAD Software:** SolidWorks (Certified Associate)
- **Design Tools:** Modern UI/UX design principles

Additional Experience

Teaching & Mentoring Experience

Docent-Begeleider (Tutor)

Studiekring | *July 2014 - November 2014*

- **Responsibilities:**
  - Provided academic tutoring and guidance to students
  - Developed teaching materials and learning strategies
  - Mentored students in various subjects
- **Skills Gained:** Teaching, mentoring, communication, educational support

Peer Coach

Hogeschool Rotterdam | *September 2013 - February 2014*

- **Responsibilities:**
  - Mentored fellow students in academic and personal development
  - Facilitated study groups and learning sessions
  - Provided guidance on academic and career planning
- **Skills Gained:** Leadership, peer mentoring, communication, academic support

---

Certifications

- **Certified SolidWorks Associate** | VirtualTester Online, Tangix Design & Development AB | *January 2015*
  - Credential ID: C-8V8RZ3MKZH
- **EFSET Quick English Check** | EF Education First | *Advanced/Proficient (CEFR C1/C2)*
- **[Add other relevant certifications]**

Languages

- **Dutch** - Native or bilingual proficiency
- **English** - Full professional proficiency (CEFR C1/C2)
- **Bosnian** - Native or bilingual proficiency
- **Croatian** - Conversational
- **Serbian** - Conversational

Additional Information

Professional Development

- [Add any ongoing learning, courses, or professional development activities]
- [Add any conferences attended or speaking engagements]

Interests & Hobbies

- [Add relevant professional interests or hobbies that show personality]

This CV is available in multiple formats and can be easily converted to PDF using tools like Pandoc, online converters, or document processors.
